Additional feedback from workshop participants:

John is an excellent instructor and facilitator, and the group interactions (large and breakout) are also an effective way to learn.

It was very interactive. I feel like I learned actionable tips/techniques and hearing from others was great. John is a great leader/facilitator and he really kept the class moving and engaging.

I was very impressed with John's ability to involve all the participants in discussion. Hearing everyone's experiences and ideas was very helpful to me.

This training was more discussion oriented compared to some of the other trainings I've participated in.

This is a really important topic, and I'm glad that it is among the required training topics for supervisors. John was engaging and kind.

Great overall - very interactive and John made the content engaging and approachable. He was witty and quick to make connections between what people were saying and theory.

Excellent in every way. The class was relatively small which facilitated good participation, and John deftly presented the material without belaboring points or skimming over more meaty topics. Compared to other courses I've taken, John gave the coveted 'Goldilocks' presentation of the material!

It was really good, it has shifted how I view problem solving and risk taking in the work place.

John was an AMAZING facilitator. I love how he engaged all of us and seemed to care about us despite only knowing us for 6 hours. I would take any course John does!

I loved the participation and the tie to our everyday lives.
